

Kinetics Small Cap Opportunities Fund

(KSCOX, KSOAX, KSOCX, KSCYX)

4th Quarter 2017

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. For a free copy of the fund's prospectus, which contains this and other information, visit our website at www.kineticsfunds.com or call 1-800-930-3828. You should read the prospectus carefully before you invest.

Past performance does not guarantee future results. You will be charged a redemption fee equal to 2.00% of the net amount of the redemption if you redeem or exchange your shares less than 30 days after you purchase them. As a non-diversified fund, the value of its shares may fluctuate more than shares invested in a broader range of companies.

Unlike other investment companies that directly acquire and manage their own portfolios of securities, the Fund pursues its investment objective by investing all of its investable assets in a corresponding portfolio series of Kinetics Portfolio Trust The Standard & Poor's SmallCap 600 Index ("S&P SmallCap 600") represents an unmanaged, broad-based basket of stocks. It is typically used as a proxy for overall market performance. S&P SmallCap 600 returns assume that dividends are reinvested. You cannot invest directly in the S&P SmallCap 600 Index. This presentation is for informational purposes only, is not a solicitation to purchase shares, does not constitute investment or tax advice and is not a public or private offering or recommendation of any kind. This document and its content are the property of Horizon Kinetics LLC ("Horizon Kinetics") and cannot be reproduced or transmitted to any person in any form or by any means in whole or part without prior written consent from Horizon Kinetics. Mutual Funds, including the Kinetics Small Cap Opportunities Fund, are subject to stock market risks and significant fluctuations in value. If the stock market declines in value, the Fund is likely to decline in value and you could lose money on your investment.

This Fund may invest in options and bonds, which carry special risks further discussed in the Fund's Prospectus. Concentrated portfolios that invest a substantial portion of their assets in a particular industry carry a risk that a group of industry-related stocks will decline in price due to industry specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react comparably to industry specific market or economic developments. The Fund may invest in the equity securities of small and medium size companies. Small and medium-size companies often have narrower markets and more limited managerial and financial resources than do larger, more established companies. As a result, their performance can be more volatile and they face a greater risk of business failure, which could increase the volatility of the Fund's assets.

The fund holds investments that provide exposure to bitcoin. Bitcoin represents a relatively new asset class and its value can be volatile. There are number of unique characteristics associated with bitcoin, thus contributing to price volatility which could adversely affect the fund's investments. Additionally, certain of the bitcoin products in which the fund invests may trade at a premium or discount to net asset value. Therefore, it is possible that the bitcoin instruments held by the fund fluctuate more or less than the value of bitcoin itself. As always, investors should carefully read the fund's prospectus risks for a complete list of applicable risks.

The Fund may invest in foreign securities, which can carry higher returns but involve more risks than those associated with U.S. investments. Additional risks associated with investments in foreign securities include currency fluctuations, political and economic instability, differences in financial reporting standards and less stringent regulation of securities markets. In a non-diversified Fund, more of the Fund's assets may be concentrated in the common stock of any single issuer, which may make the value of the Fund's shares more susceptible to certain risks than shares of a diversified mutual fund. Portfolio holdings information is subject to change at any time and is as of the date shown. For more information, you may visit www.kineticsfunds.com.

Firm Overview

At a Glance

Horizon Kinetics LLC

- Independent, employee owned, serving clients since 1994.
- \$5.7 billion in firm-wide assets under management¹.
- 75 employees.
- Offices in New York City, White Plains, NY and Summit, NJ.

Stable, tenured investment team

- Co-Founders investing together for over 30 years.
 - **Murray Stahl** – Chairman, CEO, and CIO
 - **Steven Bregman** – President, Senior Portfolio Manager and Director of Research
 - **Peter Doyle** – President of Kinetics Mutual Funds, Inc. and Senior Portfolio Manager
- 17 Investment Professionals with an average tenure of 14 years with the firm and 24 years in the industry.

Dedicated Culture

- Committed exclusively to investment research and portfolio management across the capital structure.
- Independent publisher of research for institutional investment community since 1995.
- Adhering to a research-intensive, time-tested fundamental investment philosophy.
- Institutional quality client service and operations infrastructure.

Investment Approach

- Independent Thinking
 - Primary source data driven process.
 - Research analysts culturally guided to overcome confirmation biases and data availability errors.
- Opportunity
 - Seek above market returns with reduced chances of loss by capturing high discount rates associated with the “Equity Yield Curve.”
 - Earn returns of underlying fundamental business and potential narrowing of discount rate.
- Focus
 - Research team and process organized around attributes associated with long-term excess returns.
 - Seek to avoid the permanent loss of capital.
- Differentiated
 - Philosophy and process lead us to explore lesser researched and less frequently trafficked investments.
 - High active share² by design.
- Discipline
 - Portfolio Managers and Research Analysts must write logical, clear and understandable investment theses that withstand internal and external scrutiny.
- Patience
 - Capturing long-term excess returns requires commitment.

¹ As of December 2017

² Active share is a measure of the percentage of holdings in a portfolio that differ from a benchmark index. It is calculated by taking the sum of the differences of the weight of each holding in the portfolio and the weight of each holding in the benchmark index and dividing by two. Active share is measured against the strategy's primary benchmark.

Background:

Our co-founders created Horizon Asset Management LLC in 1994 and Kinetics Asset Management LLC in 1996, in answer to the extraordinary structural changes that were occurring in the personalized investment management industry. The firm is dedicated to “long-horizon” investing and to providing solutions away from mass-market, asset allocation driven approaches to investing which we believe can be higher risk, higher cost, and tax-inefficient to most investors.

Guiding Principles:

- We are committed to long-horizon, value driven investing and building long-term, continuous relationships with influencers of external permanent capital.
- We are contrarian investors and our vision is diametrically opposed to the movement of the crowd.
- Our investment approach stresses absolute returns, blending a combination of fundamental research, discipline and patience with the goal of long-term preservation and compounding of capital.
- We measure our success based on the net economic basis we can deliver to our clients, after allowance of applicable taxes, inflation and fees.
- We measure risk as an impairment of capital. Temporary price variability is not synonymous with risk. Returns can be increased by extension of the investment horizon rather than by extension of risk.
- Our strategies are driven by fundamental research and opportunity, not capacity for asset gathering.
- We invest alongside our clients and believe that a skin in the game approach is critical to aligning interests.

Firm Overview

Strategy and Client Type Overview

Firmwide Assets Under Management¹ **\$5.7 B**

Separately Managed Accounts² **\$3.9 B**

- Equities
- High-Yield
- Liquid Alternatives/ Low Volatility
- Opportunistic Investments, i.e. Distressed Debt

Kinetics Mutual Funds³ **\$1.3 B**

- Broad Markets
- Specialty Markets
- Income-Related

Alternative Investments* **\$0.5 B**

Client Assets by Type¹

*Additional information available upon request for qualified investors.

¹AUM and client type as of 12/31/2017.

²Includes assets in customized portfolios, other strategies developed for intermediaries, and sub-advised assets.

³Kinetics Mutual Funds, Inc. ("Kinetics Funds") are distributed by Kinetics Funds Distributor LLC ("KFD"), an affiliate of Horizon Kinetics LLC. KFD is not affiliated with the Kinetics Funds.

⁴Includes individual client accounts through intermediaries.

You should consider the investment objectives, risks, charges and expenses of the mutual funds carefully before investing. You should read the prospectus carefully before you invest.

Investment Philosophy & Process

Investment Philosophy

The Equity Yield Curve

Investors' short-term interests can create significant mispricing of long-term investments. We believe a long-term investment horizon is essential to reducing chance of loss and earning excess return.

Equity Yield Curve

Return Dynamics

- Investors tend to overly discount future value creation that is likely, but for which the timing is unknown. As the timing risk decreases, so does the valuation discount.
- At a minimum, we expect to earn the underlying businesses' return on capital over time.
- Purchasing investments at substantial discounts to our assessment of future value reduces the likelihood and magnitude of capital losses
- Valuation multiple expansion often accompanies fundamental improvement or greater visibility into value recognition. Often, the market price will fully reflect future value, driving returns for existing shareholders, but muting future return potential.

Idea Generation

Dynamic, unconventional thinking is required in order to consistently find successful long-term investments over the course of a full business cycle.

Investment team avoids relying solely on conventional descriptive attributes and places greater emphasis on attributes that are verifiable but not always readily quantifiable.

Confirmation and availability biases refer to an investor's tendency to assign greater importance to information that is readily available, easily organized, and consistent with pre-conceived views.

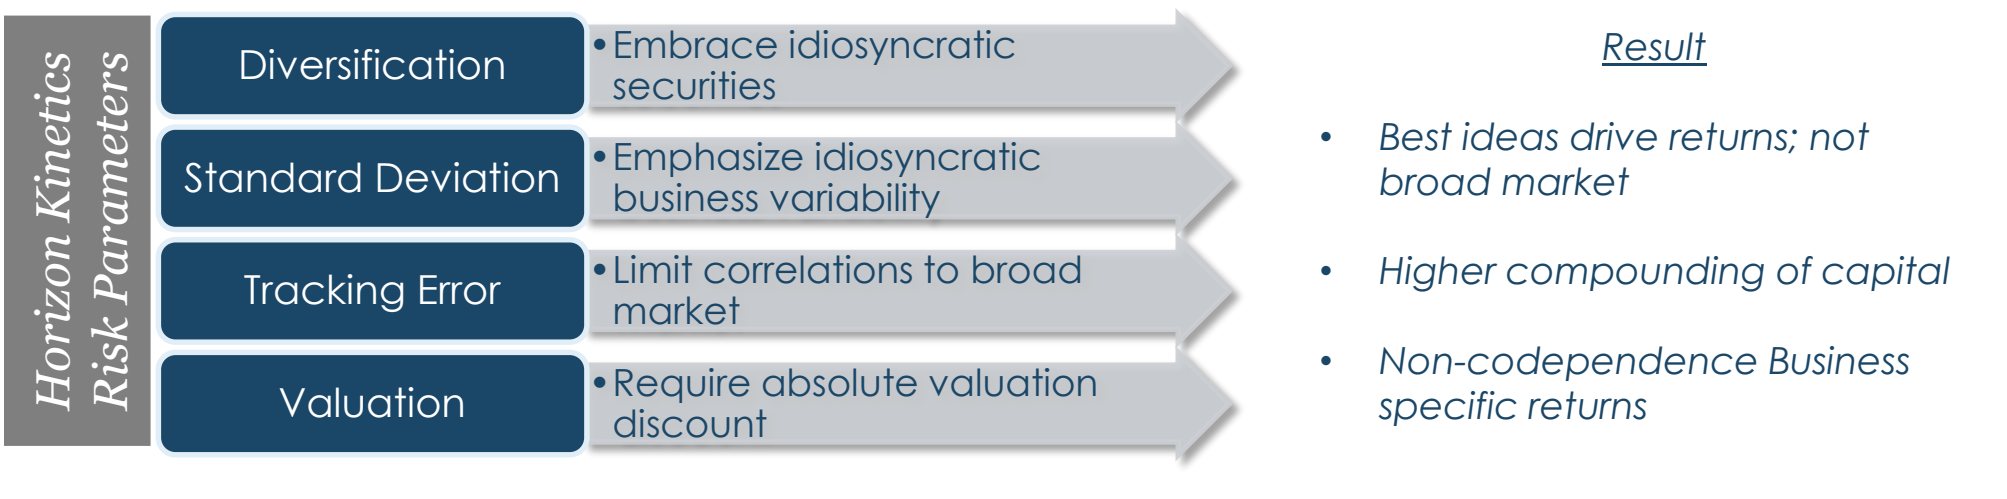

Opportunity sets of value investments gyrate with market cycles, requiring flexibility to adjust for prevailing investment environment

| IDEA GENERATION | |
|--|---|
| Conventional Screens (Mainstream Investors) | Unconventional Attributes (Horizon Kinetics) |
| Style (Growth, Core, Value) | Owner-Operators |
| Sector / Industry | Bits and Pieces |
| Market Capitalization (small, mid, large) | Dormant Assets |
| Geography (Country, Region) | Scalability |
| Momentum (Price, Earnings) | Terms-of-Trade |
| Price Risk (Volatility) | Product Lifecycle |
| Valuation (P/B, P/E, P/S) | Spin-Off |
| | Liquidation |

| | |
|---------------------------------|--|
| Time Diversification | Avoid attempting to time the market, and instead average into and out of positions over time. |
| Initial Position Sizing | Initial position sizes are typically built to 2% of the portfolio and may be allowed to appreciate as determined appropriate. |
| Concentration | Positions are sized by portfolio managers' judgment of discount rate magnitude along with an assessment of unconventional business attributes. |
| Multi-Security Positions | Multi-security positions are used when we have a high degree of conviction regarding a group of related businesses or a theme. |
| Rebalancing | Limit rebalancing to maximize returns and reduce transaction costs. |
| Cash Allocation | Cash allocation is a function of the attractiveness of investment opportunities at any given point in time. |

Kinetics Small Cap Opportunities Fund Performance & Strategy Update

Historical Performance Results

The Small Cap Opportunities Fund – KSCOX

- Kinetics Asset Management LLC is the investment adviser to Kinetics Mutual Funds, Inc., a series of U.S. registered investment companies, which includes The Kinetics Small Cap Opportunities Fund.
- U.S. focused global small-cap fund seeking to invest in fundamentally undervalued companies with market capitalizations at or below the highest market capitalization of a component security within the S&P SmallCap 600 Index.
- Investments are concentrated in companies that have a small capitalization with the potential to expand to higher valuations either through revaluation, growth or a combination thereof.
- Fund targets companies with substantial barriers to entry, long product life cycles and sound capital structures; on occasion companies may be less mature companies and in the process of developing a superior product or market niche.

As of 12/31/2017

Growth of \$10,000 Returns Since Inception

| As of 12/31/2017 | Annualized Returns (%) | | | | Since Inception (Net %) | |
|------------------------|------------------------|--------|--------|---------|-------------------------|-------------------|
| | 1 Year | 3 Year | 5 Year | 10 Year | Return % Ann. | Volatility % Ann. |
| Small Cap Fund | 26.23 | 11.27 | 15.28 | 5.39 | 10.34 | 19.54 |
| S&P SmallCap 600 Index | 13.23 | 12.00 | 15.99 | 10.43 | 9.93 | 18.27 |
| <i>Excess Return</i> | 13.00 | -0.72 | -0.71 | -5.04 | 0.41 | |

Rolling 5-Year Performance Small Cap Opportunities Fund (Net) vs. the S&P SmallCap 600 Index

| As of 12/31/2017 | Inception Date | # of 5-Year Periods | Total Return > Index | Total Return >0% | Total Return >10% |
|-----------------------|----------------|---------------------|----------------------|------------------|-------------------|
| Small Cap Fund | 3/20/2000 | 154 | 40% | 85% | 54% |

Performance shown is that of the Kinetics Small Cap Opportunities Fund (No-Load Class). Gross expense ratios listed for the No-Load Class and Institutional Class are as of 12/31/2016 as reported in the 5/1/2017 prospectus. Gross expense ratios listed for Advisor Class A and Advisor Class C are as of 12/31/2016 as reported in the 4/28/2017 prospectus. The Fund's adviser has voluntarily agreed to waive management fees and reimburse fund expenses so that net annual fund operating expenses do not exceed certain levels, not including acquired fund fees and expenses (AFFE), through May 1, 2018 and may be discontinued at any time by the Fund's adviser after May 1, 2018. The net assets in the Fund as of December 31, 2017 were approximately \$181.8 million. The inception date is March 20, 2000. Performance includes the reinvestment of dividends. Past performance is no guarantee of future results and an investment can lose money. Performance does not reflect the deduction of a sales load or fee, which, if included, would reduce the performance quoted. You will be charged a redemption fee equal to 2.00% of the net amount of the redemption if you redeem or exchange your shares 30 days or less after you purchase them. An investor's investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. You should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. Investors may visit our website at www.kineticsfunds.com or call us at 1-800-930-3828 for performance data current to the most recent month-end and for a copy of the most recent Prospectus. You should read the prospectus before you invest.

Rolling 5-Year Performance and Volatility statistics begin with first complete month of performance.

The Growth of \$10,000 chart illustrates the performance of a hypothetical \$10,000 investment made in No Load Class shares commencement of operations (3/20/00). It assumes reinvestment of capital gains and dividends. This chart is not intended to imply any future performance.

Portfolio Top 10 Holdings

The Small Cap Opportunities Fund – December 31, 2017

| Name | % of Portfolio | Horizon Kinetics' Perspective |
|---------------------------------|----------------|--|
| Texas Pacific Land Trust | 29.5 | Texas Pacific Land Trust is a gradual self-liquidating real estate trust, which generates cash flow via periodic land sales and oil royalties from owned land in Texas. Recently, the Trust has formed a water services company, in order to monetize its access to water on its acreage, which is in high demand due to the high water usage, and need for disposal, during the extraction process. |
| Icahn Enterprises LP | 9.5 | Carl Icahn is a consummate activist investor as well as an owner-operator. IEP's current trading price appears low relative to the company's intrinsic value. |
| Dream Unlimited Corp. - Class A | 7.5 | DREAM is a diversified real estate investment and asset management company that was spun off from Dundee Corp. in mid 2013. The operating model combines the recurring cash flow of the asset management business with real estate and energy infrastructure balance sheet assets. |
| The Howard Hughes Corporation | 7.3 | Howard Hughes Corp. was spun off from General Growth Properties during that company's restructuring following the financial crisis. Howard Hughes is in the process of developing several valuable properties, including the South Street Seaport in New York City, Ward Centers in Hawaii, and The Woodlands in Texas. Several of the company's major projects are nearing completion; as they begin to generate cash flows, we believe the value drivers will become clearer to investors. |
| The Wendy's Company | 4.8 | Wendy's has implemented a turnaround initiative intended to increase its international presence, add healthy options to the menu, reduce the number of company-owned stores in favor of franchises, and re-image its restaurants. |
| Civeo Corporation | 4.2 | Civeo was spun off from Oil States International in June, 2014. The company provides accommodation services for workers on natural resource projects in remote areas. The company announced a transformational acquisition in November 2017, with the potential to increase free cash flow and lower leverage. |
| Live Nation Entertainment, Inc. | 4.1 | Live Nation is an entertainment and ecommerce company that produces, markets and sells tickets for live concerts globally. John Malone's Liberty Media acts as an owner-operator. |
| Onex Corporation | 3.8 | Private equity and asset management firm based in Toronto, Canada, and managed by owner-operator and founder Gerald Schwartz. The stock trades at an attractive valuation despite a history of substantial growth in book value and significant share repurchases. |
| The Bitcoin Investment Trust | 3.7 | The Bitcoin Investment Trust invests in bitcoin, a cryptocurrency with the potential to appreciate significantly should it become established as either a store of value or a transactional currency. If bitcoin were to capture even a small share of the electronic payments market, the value of each coin would increase dramatically due to the limited number of coins to be produced. |
| Rubis SCA | 3.7 | Rubis specializes in the distribution and storage of oil and chemical products. The company has shown improving financial and operational results, in spite of a challenging environment for energy and commodity-related businesses. |

Holdings information is presented for illustrative purposes only, portfolio holdings are subject to change without notice and it should not be assumed that the holdings were or will prove to be profitable. Holdings are expressed as a percentage of the total net investment and may vary over time. Equity holdings are subject to change, and may not be indicative of actual market position due to the use of call and put options.

Country Allocation, %

Kinetics Small Cap Opportunities Fund

Investment Examples

Live Nation Entertainment (Ticker: LYV)

- Live Nation is the leading live entertainment company in the world providing concert and event promotion, ticketing, artist management and advertising and sponsorship.
- The company promoted over 26,000 global events in 2016, hosting over 71 million fans, while selling approximately 186 million tickets to self-promoted and third party events via the Ticketmaster platform. The company has grown margins through increased monetization of sponsorship and advertising opportunities related to concerts and festivals.
- Live entertainment is not only becoming an emphasis for consumers (as evidenced by higher attendance and average ticket prices), but artists currently earn as much as 90% of annual revenue from touring due to decreased fees earned from streaming revenue. Live Nation is an increasingly important value driver for consumers and artists alike.
- The concert promotion and ticket markets remain highly fragmented, and as the industry leader Live Nation continues to build market share, drive efficiencies and grow cash flow.

Texas Pacific Land Trust

Texas Pacific Land Trust (Ticker: TPL)

- TPL is a land trust that was created in 1888 as a result of the bankruptcy of the Texas and Pacific Railway Company. The Trust currently owns approximately 878,000 surface acres and 373,000 gross royalty acres in western Texas, much of which is located in the Delaware and Midland Basins within the Permian Basin.
- TPL currently derives its operating revenue from the management of the land, primarily from oil and gas mineral royalties and surface land easements. The nature of the business lead to very high gross margins and cash flow conversion - this cash flow has historically been combined with proceeds from land sales to fund the repurchase of shares in the Trust.
- Recent advances in drilling technology and oil exploration techniques have led to a sharp increase in recoverable oil and gas reserves in the Permian Basin that amongst the lowest cost to extract in the world. As a result there has been an increase in drilling activity and infrastructure development, both driving higher margin revenue to the Trust.
- The drilling techniques used in the basin require vast amounts of water to stimulate the wells, while also unearthing even larger quantities of waste water from the wells. In response, the Trust has created a subsidiary called Texas Pacific Water Resources LLC. The intent is to provide water-related services to companies engaged in oil drilling activities in the Permian Basin. These would include water sourcing, treatment and recycling, as well as associated infrastructure construction, disposal and even well testing services.

The Fund held these securities as of December 31, 2017. Please see slide 17 for the top holdings of the Fund. Specific holdings may change at any time without notice.

Murray Stahl

Chairman, Chief Executive Officer, Chief Investment Officer

Murray is Chief Executive Officer, Chairman of the Board of Horizon Kinetics and is a co-founder of the Firm. He has over thirty years of investing experience and is responsible for overseeing the Firm's proprietary research. Murray serves as the Firm's Chief Investment Officer, and chairs the Firm's Investment Committee, which is responsible for portfolio management decisions across the entire Firm. He is also the Co-Portfolio Manager for a number of registered investment companies, private funds, and institutional separate accounts. Additionally, Murray is the Chairman and Chief Executive Officer of FRMO Corp. He is also a member of the Board of Directors of the Bermuda Stock Exchange, the Minneapolis Grain Exchange, Winland Electronics, Inc., and IL&FS Securities Services Limited. Prior to co-founding the Firm, Murray spent 16 years at Bankers Trust Company (1978-1994) as a senior portfolio manager and research analyst. As a senior fund manager, he was responsible for investing the Utility Mutual Fund, along with three of the bank's Common Trust Funds: The Special Opportunity Fund, The Utility Fund, and The Tangible Assets Fund. He was also a member of the Equity Strategy Group and the Investment Strategy Group, which established asset allocation guidelines for the Private Bank. Murray received a Bachelor of Arts in 1976, a Masters of Arts in 1980 from Brooklyn College, and an MBA from Pace University in 1985.

Peter Doyle

Managing Director, President of Kinetics Mutual Funds, Inc.

Peter is a Managing Director and co-founder of the Firm. He is a senior member of the research team, and a member of the Investment Committee and the Board. Peter is a Co-Portfolio Manager for several registered investment companies, private funds, and institutional separate accounts. He is also responsible for oversight of the Firm's marketing and sales activities and is the Vice President of FRMO Corp. Previously, Peter was with Bankers Trust Company (1985-1994) as a Senior Investment Officer, where he also served on the Finance, Utility and REIT Research sub-group teams. Peter received a BS from St. John's University and an MBA from Fordham University.

Steven Bregman

President

Steven is the President of Horizon Kinetics and is a co-founder of the Firm. He is a senior member of the Firm's research team, a member of the Investment Committee and Board, and supervises all research reports produced by the Firm. As one of the largest independent research firms, Horizon focuses on structurally inefficient market sectors, including domestic spin-offs, global spin-offs (The Spin-Off Report and (Global Spin-Off Report), distressed debt (Contrarian Fixed Income) and short sale candidates (Devil's Advocate), among others. Horizon Kinetics has also taken an interest in creating functionally improved indexes, such as the Spin-Off Indexes and the Wealth Indexes (which incorporate the owner-operator return variable). Steve is also the President and CFO of FRMO Corp., a publicly traded company with interests in Horizon Kinetics. He received a BA from Hunter College, and his CFA® Charter in 1989. Steve has authored a variety of papers, notably "Spin-offs Revisited: A Review of a Structural Pricing Anomaly" (1996) and "Equity Strategies and Inflation" (2012).

Thomas Ewing

Co-Founder, Managing Director

Tom joined the Firm in 1996 and is a member of both the Board and the Investment Committee. Tom oversees Horizon's North Carolina office and is instrumental in the creation of new Horizon Kinetics investment strategies. Previously, Tom was a Marketing Director with Smith Barney's Capital Management Division (1989-1991) and then a Financial Consultant at Wheat First Butcher Singer (1991-1996). Tom received a BA from Washington & Lee University.

Hugh Ross

Chief Operating Officer

Hugh joined the Firm in 2009 and is responsible for overseeing all non-investment functions for Horizon Kinetics. He is also a member of the Board. Previously, Hugh served as the Chief Operating Officer of the Global Manager Strategies Group within Goldman Sachs Asset Management (GSAM), and immediately prior to this, he served as a compliance officer for both GSAM and Goldman's Private Wealth Management business. Prior to joining Goldman Sachs, Hugh served as an Associate Counsel for ChaseMellon Shareholder Services and also worked as an attorney with a securities industry boutique law firm whose practice focused on broker/dealer and investment adviser regulatory matters. Hugh received a BBA from Emory University and a JD from New York Law School.

Russ Grimaldi

Chief Compliance Officer, Associate General Counsel

Russ joined the Firm in 2005 and currently serves as the Chief Compliance Officer and Associate General Counsel. He oversees the Firm's compliance program and supports all legal and regulatory functions. Russ has substantial experience with the rules and regulations governing the investment management industry and is a member of several of the Firm's operating committees. Russ holds a BA in Legal Studies from Quinnipiac University (cum laude) and a JD from Albany Law School.

Jay Kesslen

General Counsel

Jay joined the Firm in 1999 and currently serves as General Counsel, Managing Director, and is a member of the Board. He oversees all aspects of the Firm's legal affairs, advises on all material compliance matters, and is responsible for the Firm's corporate governance. Jay is the Firm's Anti-Money Laundering Officer and also serves as a Director for several private funds managed by subsidiaries of the Firm. He is also Vice President and Assistant Secretary for Kinetics Mutual Funds, Inc., a series of U.S. mutual funds managed by Kinetics Asset Management LLC, a subsidiary of the Firm. Jay also serves as the General Counsel of FRMO Corp., a publicly traded company. Jay holds a BA in Economics from the State University of New York at Plattsburgh (cum laude) and a JD from Albany Law School.

Beta: A statistic that measures the volatility of the fund, as compared to that of the overall market. The market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. The Beta has been calculated using data since the fund's inception.

Standard Deviation: A statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. The standard deviation has been calculated since inception.

Up Market Capture Ratio: A statistical measure of an investment manager's overall performance in up-markets. The up-market capture ratio is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen. The up-market capture ratio has been calculated since inception.

Down Market Capture Ratio: A statistical measure of an investment manager's overall performance in down-markets. The down-market capture ratio is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped. The down-market capture ratio has been calculated since inception.

Sharpe Ratio: A statistical measure that uses standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio implies a better historical risk-adjusted performance. The Sharpe ratio has been calculated since inception using the 3-month treasury bill for the risk-free rate of return.

Weighted Avg. Mkt. Cap: The mean market capitalization (value of outstanding shares) of a basket of stocks, taking into account the relative weight of each investment.

Median Market Capitalization: The median market capitalization (value of outstanding shares) of a basket of stocks.

Price to Book Ratio: The harmonic weighted average of the price/book (P/B) ratios of the equity securities referenced. The ratio calculated by dividing the current price of the stock by the company's book value per share (assets minus liabilities).

Price to Earnings Ratio: The harmonic weighted average of the price/earnings (P/E) ratios of the equity securities referenced. The P/E ratio is calculated by dividing the current price of the stock by the trailing one year earnings.

Return on Equity: The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

Turnover Ratio: A measure of how frequently assets within a fund are bought and sold by the managers represented over a one year period.
