Internet Fund Overview

- A fund that invests in undervalued companies participating in the growth of the Internet.
- Focused not only on investing in traditional technology companies, but also those that provide new kinds of services or products made possible by development or improvement of Internet-related technologies within a variety of sectors.
- Favor companies with strong alignment of interest and high barriers to entry, such as growing information library, scalability and network/adoption.

The Internet Fund No Load Class inception date is 10/21/96. Figures include changes in principal value, reinvested dividends and capital gains distributions. Performance data quoted represents past performance and does not guarantee future results. Investment return and principal value will vary, and shares may be worth more or less at redemption than at original purchase. Call 1-800-930-3828 or visit us at www.kineticsfunds.com for the most recent month-end performance data. Current performance may be lower or higher than the performance data quoted. Performance data does not reflect the deduction of sales load or fee which, if reflected, would reduce the performance quoted. You will be charged a redemption fee equal to 2.00% of the net amount of the redemption if you redeem or exchange your shares 30 days or less after you purchase them.

Definitions:

Active share: A measure of the percentage of holdings in a portfolio that differ from a benchmark index. It is calculated by taking the sum of the differences of the weight of each holding in the portfolio and the weight of each holding in the benchmark index and dividing by two. Active share is measured against the iShares S&P 500 ETF. Beta: A statistic that measures the volatility of the fund, as compared to the overall market. The market's beta is set at 1.00; therefore a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. It is important to note that a low beta for a fund does not necessarily imply that the fund has a low level of volatility, a low beta signifies only that the fund's market-related risk is low. Down Market Capture Ratio: A statistical measure of an investment manager's overall performance in down-markets. The down-market capture ratio is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped. The down-market capture ratio has been calculated since 11/01/96. **Median Market Capitalization**: The median market capitalization (value of outstanding shares) of a basket of stocks. Unit Investment Trusts are excluded from the calculation. Unit Investment Trusts are excluded from the calculation. Price to Book Ratio: The harmonic weighted average of the price/book (P/B) ratios of the equity securities referenced. The ratio calculated by dividing the current price of the stock by the company's book value per share (assets minus liabilities). Unit Investment Trusts are excluded from the calculation. Unit Investment Trusts are excluded from the calculation. **Price to Earnings Ratio:** The harmonic weighted average of the price/earnings (P/E) ratios of the equity securities referenced. The P/E ratio is calculated by dividing the current price of the stock by the trailing one year earnings. Unit Investment Trusts are excluded from the calculation. **Return on Equity:** The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested. Unit Investment Trusts are excluded from the calculation. Sharpe Ratio: A statistical measure that uses standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio implies a better historical risk-adjusted performance. The Sharpe ratio has been calculated since 11/01/96 using the 3-month treasury bill for the risk-free rate of return. **Standard Deviation:** A statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. The standard deviation has been calculated since 11/01/96. Turnover Ratio: A measure of how frequently assets within a fund are bought and sold by the managers represented over a one year period. Up Market Capture Ratio: A statistical measure of an investment manager's overall performance in up-markets. The up-market capture ratio is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen. The up-market capture ratio has been calculated since 11/01/96. Weighted Avg. Mkt. Cap: The mean market capitalization (value of outstanding shares) of a basket of stocks, taking into account the relative weight of each investment. Unit Investment Trusts are excluded from the calculation.

The Gross expense ratios listed are as of 12/31/2024 as reported in the 4/30/2025 prospectus. The Fund's adviser voluntarily agreed to waive management fees and reimburse fund expenses so that net annual fund operating expenses do not exceed certain levels, not including acquired fund fees and expenses (AFFE), through April 30, 2026 and may be discontinued at any time by the Fund's adviser after April 30, 2026.

In April 2019, Kinetics Asset Management LLC ("KAM") and Kinetics Advisers, LLC ("KA") reorganized into Horizon Asset Management LLC ("HAM"), following which HAM was renamed Horizon Kinetics Asset Management LLC ("HKAM"). KAM, HAM and KA were all wholly-owned subsidiaries of Horizon Kinetics LLC, and HKAM will remain a wholly-owned subsidiary. HKAM is the Fund's adviser, previously, KAM was the Fund's adviser. Neither the portfolio managers of the Fund nor the Fund's investment objective and investment strategy have changed.

The Growth of \$10,000 chart illustrates the performance of a hypothetical \$10,000 investment made in No Load Class shares on commencement of operations (10/21/96). It assumes reinvestment of capital gains and dividends. This chart is not intended to imply any future performance.

Holdings are expressed as a percentage of total net investments and may vary over time. Equity holdings are subject to change, and may not be indicative of actual market position due to the use of call and put

The Top 10 Industries and Top Countries displayed represent a percentage of the net assets and excludes cash equivalents and other assets in excess of liabilities.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. For a free copy of the fund's prospectus, which contains this and other information, visit our website at www.kineticsfunds.com or call 1-800-930-3828. You should read the prospectus carefully before

YOU INVEST.As a non-diversified fund, the value of its shares may fluctuate more than shares invested in a broader range of companies. In addition, investing in foreign securities involves more risk than just U.S. investments, including the risk of currency fluctuations, political and economic instability and differences in financial reporting standards. There may also be heightened risks investing in non-investment grade debt securities and the use of options. There are also risks associated with investing in small and medium sized companies. Non-investment grade debt securities, i.e., junk bonds, are subject to greater credit risk, price volatility and risk of loss than investment grade securities. Options contain special risks including the imperfect correlation between the value of the option and the value of the underlying asset. Furthermore, Internet stocks are subject to a rate of change in technology obsolescence and competition that is generally higher than that of other industries, and have experienced extreme price and volume fluctuations. Unlike other investment companies that directly acquire and manage their own portfolios of securities, the Fund pursues its investment objective by investing all of its investable assets in a corresponding portfolio series of kinetics Portfolios Trust.

The Fund holds investments that provide exposure to bitcoin. The value of bitcoins is determined by the supply of and demand for bitcoins in the global market for the trading of bitcoins, which consists of transactions on electronic bitcoin exchanges ("Bitcoin Exchanges"). Pricing on Bitcoin Exchanges and other venues can be volatile and can adversely affect the value of the bitcoin. Currently, there is relatively small use of bitcoins in the retail and commercial marketplace in comparison to the relatively large use of bitcoins by speculators, thus contributing to price volatility that could adversely affect a portfolio's direct or indirect investments in bitcoin. Bitcoin transactions are irrevocable, and stolen or incorrectly transferred bitcoins may be irretrievable. As a result, any incorrectly executed bitcoin transactions could adversely affect the value of a portfolio's direct or indirect investment in bitcoin. Only investors who can appreciate the risks associated with an investment should invest in cryptocurrencies or products that offer cryptocurrency exposure. As with all investments, investors should consult with their investment, legal and tax professionals before investing, as you may lose money.

S&P 500 Index statistics chart data is based on the iShares S&P 500 Index Fund for market cap, price to book, price to earnings, return on equity, and active share. iShares is a product of BlackRock, Inc.
The NASDAQ Composite (NASDAQ) and the Standard & Poor's 500 Index (S&P 500) each represent an unmanaged, broad-based basket of stocks. They are typically used as a proxy for overall market performance.
NASDAQ Composite returns stated above do NOT include reinvested dividends, while the S&P 500 Index returns assume that dividends are reinvested. An investor cannot invest directly in an index.

Murray Stahl is a member of the Board of Directors of Texas Pacific Land Corporation ("TPL") and Miami International Holdings ("MIAX"), both of which are holdings in certain client accounts and funds managed by Horizon Kinetics Asset Management LLC ("HKAM"). Officers, directors and employees may also hold substantial amounts of TPL and MIAX, both directly and indirectly, in their personal accounts. HKAM seeks to address potential conflicts of interest through the adoption of various policies and procedures, which include both electronic and physical safeguards. Additionally, Mr. Stahl does not exercise investment discretion over either TPL or MIAX. All personal and proprietary trading is subject to HKAM's Code of Ethics and is monitored by the firm's Legal and Compliance Department.
