HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the 12-month period ended December 31, 2025, the Fund's No-Load class posted a loss of 3.09% trailing the S&P 500 Index and MSCI EAFE Index which posted gains of 17.88% and 31.22%, respectively.

WHAT FACTORS INFLUENCED PERFORMANCE

The Fund's performance was driven by negative returns in specific land companies and blockchain/Bitcoin related investments. These investments remain strong long-term investments, despite having mixed performance this year. These losses were partially offset by gains in electric utility, precious metal royalty and asset management holding companies.

POSITIONING

The portfolio remains focused on high-quality, durable businesses with exposure to hard assets, which we believe are well-positioned to perform across various macroeconomic conditions. These businesses often have exposure to dynamic end markets in capital markets related industries that have unique growth potential. Guided by our long-term value investment philosophy, the Fund may experience periods of outperformance or underperformance relative to the benchmark, but we believe the Fund is well-positioned to generate above-market returns over the long term.

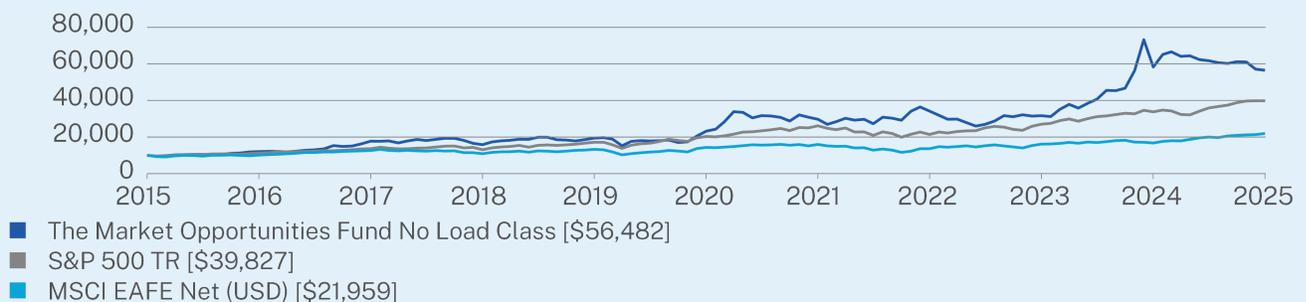

PERFORMANCE

The Fund's top contributor: Security selection within precious metals, specifically Wheaton Precious Metals (Ticker: HEI). The Fund's top detractor: Security selection within the blockchain/crypto, specifically Grayscale Bitcoin Trust (Ticker: GBTC).
