Important Risk Disclosures

HORIZON KINETICS

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. For a free copy of the fund's prospectus, which contains this and other information, visit our website at www.kineticsfunds.com or call 1-800-930-3828. You should read the prospectus carefully before you invest.

In April 2019, Kinetics Asset Management LLC ("KAM"), Kinetics Advisers, LLC ("KA") and Horizon Asset Management LLC ("HAM") all merged into Horizon Kinetics Asset Management LLC ("HKAM"), an investment adviser registered with the US Securities and Exchange Commission ("SEC"). HKAM is a wholly owned subsidiary of Horizon Kinetics LLC ("HK"). HK is a wholly owned subsidiary of Horizon Kinetics Holding Corporation ("HKHC"). HKAM is the Fund's adviser, previously, KAM was the Fund's adviser. Neither the portfolio managers of the Fund nor the Fund's investment objective and investment strategy have changed.

Past performance does not guarantee future results. You will be charged a redemption fee equal to 2.00% of the net amount of the redemption if you redeem or exchange your shares less than 30 days after you purchase them. As a non-diversified fund, the value of its shares may fluctuate more than shares invested in a broader range of companies. The Kinetics Global Fund is a diversified fund. Diversification does not ensure a profit or protect against loss in a declining market.

Unlike other investment companies that directly acquire and manage their own portfolios of securities, the Fund pursues its investment objective by investing all of its investable assets in a corresponding portfolio series of Kinetics Portfolio Trust. The Standard & Poor's 500 Index ("S&P 500") represents an unmanaged, broad-based basket of stocks It is typically used as a proxy for overall market performance. S&P 500 Index returns assume that dividends are reinvested. You cannot invest directly in the S&P 500. This presentation is for informational purposes only, is not a solicitation to purchase shares, does not constitute investment or tax advice and is not a public or private offering or recommendation of any kind. This document and its content are the property of Horizon Kinetics LLC ("Horizon Kinetics") and cannot be reproduced or transmitted to any person in any form or by any means in whole or part without prior written consent from Horizon Kinetics. Mutual Funds, including Kinetics Global Fund, are subject to stock market risks and significant fluctuations in value. If the stock market declines in value, the Fund is likely to decline in value and you could lose money on your investment.

This Fund may invest in options and bonds, which carry special risks further discussed in the Fund's Prospectus. Concentrated portfolios that invest a substantial portion of their assets in a particular industry carry a risk that a group of industry-related stocks will decline in price due to industry specific developments. Companies in the same or similar industries may share common characteristics and are more likely to react comparably to industry specific market or economic developments. The Fund may invest in the equity securities of small and medium size companies. Small and medium-size companies often have narrower markets and more limited managerial and financial resources than do larger, more established companies. As a result, their performance can be more volatile and they face a greater risk of business failure, which could increase the volatility of the Fund's assets.

The Fund holds investments that provide exposure to bitcoin. The value of bitcoins is determined by the supply of and demand for bitcoins in the global market for the trading of bitcoins, which consists of transactions on electronic bitcoin exchanges ("Bitcoin Exchanges"). Pricing on Bitcoin Exchanges and other venues can be volatile and can adversely affect the value of the bitcoin. Currently, there is relatively small use of bitcoins in the retail and commercial marketplace in comparison to the relatively large use of bitcoins by speculators, thus contributing to price volatility that could adversely affect a portfolio's direct or indirect investments in bitcoin. Bitcoin transactions are irrevocable, and stolen or incorrectly transferred bitcoins may be irretrievable. As a result, any incorrectly executed bitcoin transactions could adversely affect the value of a portfolio's direct or indirect investment in bitcoin. Only investors who can appreciate the risks associated with an investment should invest in cryptocurrencies or products that offer cryptocurrency exposure. As with all investments, investors should consult with their investment, legal and tax professionals before investing, as you may lose money.

The Fund may invest in foreign securities, which can carry higher returns but involve more risks than those associated with U.S. investments. Additional risks associated with investments in foreign securities include currency fluctuations, political and economic instability, differences in financial reporting standards and less stringent regulation of securities markets. Portfolio holdings information is subject to change at any time and is as of the date shown. For more information, you may visit www.kineticsfunds.com.

Peter Doyle is a member of the Board of Directors of Texas Pacific Land Corporation ("TPL"). Eric Sites, who is an employee of the Funds' adviser is a member of the Board of Directors of Miami International Holdings ("MIAX"). TPL and MIAX are holdings in certain client accounts and funds (including the Funds) managed by Horizon Kinetics Asset Management LLC ("HKAM"). Officers, directors and employees may also hold substantial amounts of TPL and MIAX, both directly and indirectly, in their personal accounts. HKAM seeks to address potential conflicts of interest through the adoption of various policies and procedures, which include both electronic and physical safeguards. Additionally, Mr. Doyle does not exercise investment discretion over TPL and Mr. Sites does not exercise investment discretion over MIAX.. All personal and proprietary trading is subject to HKAM's Code of Ethics and is monitored by the firm's Legal and Compliance Department. In connection with Mr. Doyle's appointment on the TPL Board, the Adviser entered into a Board Representation Agreement, the terms of which in HKAM's Form ADV on file with the SEC. Because it has investment and voting discretion with respect to a substantial percentage of the outstanding voting shares of TPL and MIAX, the Adviser may be deemed to be an affiliate of TPL and MIAX under certain securities laws. As a result, the Adviser and the Funds might be restricted or limited in selling shares of TPL or MIAX and may be subject to other requirements arising from such status.

Firm Overview

At a Glance

HORIZON KINETICS

Horizon Kinetics LLC

- Independent, majority employee owned, serving clients since 1994.
- $11.4 billion in firm-wide assets under management[1].
- 79 employees.
- Offices in New York City, White Plains, NY and Summit, NJ.

Stable, tenured investment team

- Co-Founders investing together for over 30 years.
  - **Steven Bregman** – Co-Chief Executive Officer, Co-Chief Investment Officer, and Senior Portfolio Manager
  - **Peter Doyle** – Co-Chief Executive Officer, Co-Chief Investment Officer, and Senior Portfolio Manager
  - **Thomas Ewing** – Managing Director
  - The late **Murray Stahl** (1953-2026)
- 20 Investment Professionals with an average tenure of 19 years with the firm and 30 years in the industry.

Dedicated Culture

- Committed exclusively to investment research and portfolio management across the capital structure.
- Independent publisher of research for institutional investment community since 1995.
- Adhering to a research-intensive, time-tested fundamental investment philosophy.
- Institutional quality client service and operations infrastructure.

Investment Approach

- Independent Thinking
  - Process driven by data and primary sources.
  - Research analysts culturally guided to overcome confirmation biases and data availability errors.
- Opportunity
  - Seek above market returns with reduced chances of loss by capturing high discount rates associated with the "Equity Yield Curve."
  - Earn returns of underlying fundamental business and potential narrowing of discount rate.
- Focus
  - Research team and process organized around attributes associated with long-term excess returns.
  - Seek to avoid the permanent loss of capital.
- Differentiated
  - Philosophy and process lead us to explore less-researched and less frequently trafficked investments.
  - High active share[2] by design.
- Discipline
  - Portfolio Managers and Research Analysts must write logical, understandable investment theses that withstand internal and external scrutiny.
- Patience
  - Capturing long-term excess returns requires commitment.

[1] As of March 31, 2026.
[2] Active share is a measure of the percentage of holdings in a portfolio that differ from a benchmark index. It is calculated by taking the sum of the differences of the weight of each holding in the portfolio and the weight of each holding in the benchmark index and dividing by two. Active share is measured against the strategy's primary benchmark.

Firm Overview

Guiding Principles

Background:

Our co-founders created Horizon Asset Management LLC in 1994 and Kinetics Asset Management LLC in 1996, both are now consolidated under the Horizon Kinetics Asset Management LLC, in answer to the extraordinary structural changes that were occurring in the personalized investment management industry.[1] The firm is dedicated to "long-horizon" investing and to providing solutions away from mass-market, asset allocation driven approaches to investing which we believe can be higher risk, higher cost, and tax-inefficient to most investors.

Guiding Principles:

- We are committed to long-horizon, value driven investing and building long-term, continuous relationships with influencers of external permanent capital.
- We are contrarian investors and our vision is diametrically opposed to the movement of the crowd.
- Our investment approach stresses absolute returns, blending a combination of fundamental research, discipline and patience with the goal of long-term preservation and compounding of capital.
- We measure our success based on the net economic basis we can deliver to our clients, after allowance of applicable taxes, inflation and fees.
- We measure risk as an impairment of capital. Temporary price variability is not synonymous with risk. Returns can be increased by extension of the investment horizon rather than by extension of risk.
- Our strategies are driven by fundamental research and opportunity, not capacity for asset gathering.
- We invest alongside our clients and believe that a skin in the game approach is critical to aligning interests.

[1]In April 2019, Kinetics Asset Management LLC ("KAM"), Kinetics Advisers, LLC ("KA") and Horizon Asset Management LLC ("HAM") all merged into Horizon Kinetics Asset Management LLC ("HKAM"), an investment adviser registered with the US Securities and Exchange Commission ("SEC"). HKAM is a wholly owned subsidiary of Horizon Kinetics LLC ("HK"). HK is a wholly owned subsidiary of Horizon Kinetics Holding Corporation ("HKHC").

Investment Philosophy & Process

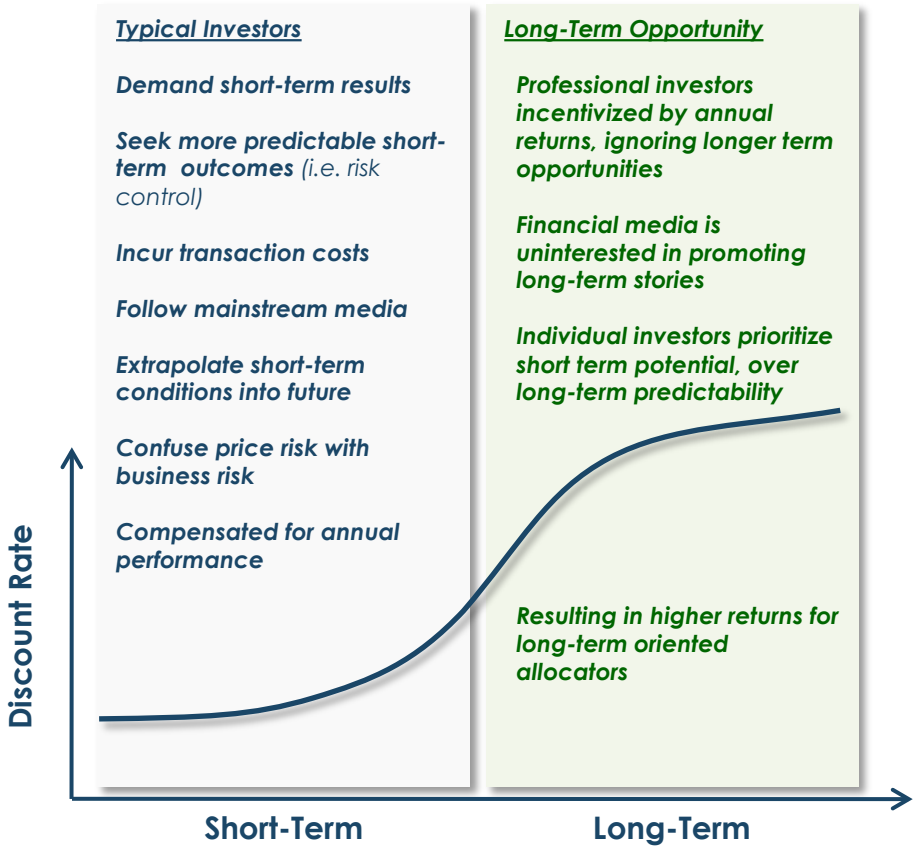
© 2026 Horizon Kinetics LLC ®. All rights reserved.

Investment Philosophy

The Equity Yield Curve

Investors' short-term interests can create significant mispricing of long-term investments. We believe a long-term investment horizon is essential to reducing chance of loss and earning excess return.

Equity Yield Curve



Return Dynamics

- *Investors tend to overly discount future value creation that is likely, but for which the timing is unknown. As the timing risk decreases, so does the valuation discount.*
- *At a minimum, we expect to earn the underlying businesses' return on capital over time.*
- *Purchasing investments at substantial discounts to our assessment of future value reduces the likelihood and magnitude of capital losses*
- *Valuation multiple expansion often accompanies fundamental improvement or greater visibility into value recognition. Often, the market price will fully reflect future value, driving returns for existing shareholders, but muting future return potential.*

Investment Philosophy

Capitalizing on Market Inefficiencies

HORIZON KINETICS

Why are securities mispriced?

Information asymmetry and human emotion (fear and greed) were once the drivers for significant market pricing discrepancies. As markets have modernized, adherents have long advocated an "efficient market" due to the vast number of market participants, along with amount of market data and speed of information dissemination. However, what if the institutionalization of asset management **now is the cause of inefficiency?**

- **Traditional asset managers:** these investors are beholden to a rigid set of investment criteria (style, size, sector, geography) and a relevant benchmark. Thus, there is an impetus to always be invested in these securities despite fundamentals.
- **Index funds:** these funds invest purely based upon a prescribed formula, often based on market driven factors such as relative market values. Thus, capital flows are indiscriminant of fundamentals.
- **Endowments & Pensions:** these large pools of capital are funded and make disbursements predicated upon return and interest rate assumptions. The result is often a higher risk exposure maintained throughout market cycles.
- **Traders:** various types of market "traders" are universally motivated by short-term profits, often ignoring longer term implications on an investment.
- **Algorithmic funds:** a growing proportion of daily market volume is being driven by algorithmic trading, seeking to exploit pricing trends and mean reversions, regardless of fundamental business attributes. The funds often seek volatility targeting and or momentum trends, exaggerating market movements.

Investment Process

Idea Generation

Dynamic, unconventional thinking is required in order to consistently find successful long-term investments over the course of a full business cycle.

Investment team avoids relying solely on conventional descriptive attributes and places greater emphasis on attributes that are verifiable but not always readily quantifiable.

Confirmation and availability biases refer to an investor's tendency to assign greater importance to information that is readily available, easily organized, and consistent with pre-conceived views.

Opportunity sets of value investments gyrate with market cycles, requiring flexibility to adjust for prevailing investment environment

IDEA GENERATION	
Conventional Screens (Mainstream Investors)	**Unconventional Attributes (Horizon Kinetics)**
Style *(Growth, Core, Value)*	Owner-Operators
Sector / Industry	Bits and Pieces
Market Capitalization *(small, mid, large)*	Dormant Assets
Geography *(Country, Region)*	Scalability
Momentum *(Price, Earnings)*	Terms-of-Trade
Price Risk *(Volatility)*	Product Lifecycle
Valuation *(P/B, P/E, P/S)*	Spin-Off
	Liquidation
	ETF Divide

Investment Process

Portfolio Construction

HORIZON KINETICS

Time Diversification	Avoid attempting to time the market, and instead average into and out of positions over time.
Initial Position Sizing/ Concentration	Positions are sized by portfolio managers' judgment of discount rate magnitude along with an assessment of unconventional business attributes.
Multi-Security Positions	Multi-security positions are used when we have a high degree of conviction regarding a group of related businesses or a theme.
Rebalancing	Limit rebalancing to maximize returns and reduce transaction costs.
Cash Allocation	Cash allocation is a function of the attractiveness of investment opportunities at any given point in time.

Fundamental Risk Management

Quantifiable Risk versus Actual Risk

HORIZON KINETICS

Conventional Risk Parameters

Diversification	• Eliminate single security risk
Standard Deviation	• Minimize return variability
Tracking Error	• Align returns with benchmark
Valuation	• Assess relative to broad market

Result

- *Generic portfolio with exposure to all companies, good and bad*
- *"Predictable" lower long-term returns and frequent rebalancing*
- *Exposure to larger index constituents regardless of fundamentals*

Horizon Kinetics Risk Parameters

Diversification	• Embrace idiosyncratic securities
Standard Deviation	• Emphasize idiosyncratic business variability
Tracking Error	• Limit correlations to broad market
Valuation	• Require absolute valuation discount

Result

- *Best ideas drive returns; not broad market*
- *Seeks higher compounding of capital*
- *Non-codependence Business specific returns*

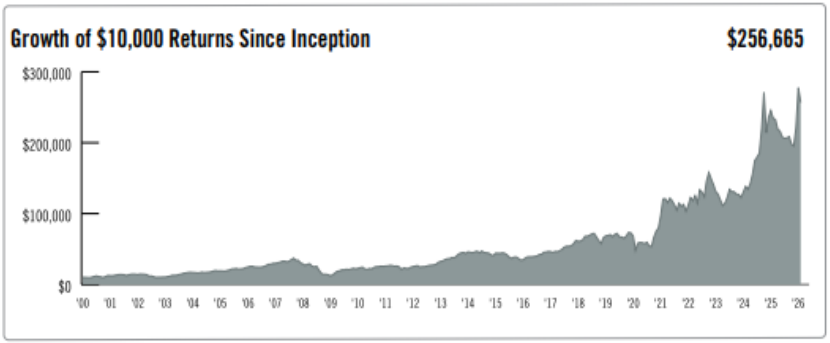
Historical Performance Results

The Small Cap Opportunities Fund – KSCOX

HORIZON KINETICS

- U.S. focused global small-cap fund seeking to invest in fundamentally undervalued companies with market capitalizations at or below the highest market capitalization of a component security within the S&P SmallCap 600 Index.
- Investments are concentrated in companies that have a small capitalization with the potential to expand to higher valuations either through revaluation, growth or a combination thereof.
- Fund targets companies with substantial barriers to entry, long product life cycles and sound capital structures; on occasion companies may be less mature companies and in the process of developing a superior product or market niche.

As of 3/31/2026



As of 3/31/2026	Annualized Returns (%)					Since Inception (Net %)	
	1 Year	3 Year	5 Year	10 Year	20 Year	Return % Ann.	Volatility % Ann.
Small Cap Fund	9.45	26.36	16.34	21.27	12.25	13.28	23.96
S&P SmallCap 600 Index	20.50	10.51	4.49	9.90	8.44	9.21	19.46
Excess Return	-11.05	15.85	11.85	11.37	3.81	4.07

Small Cap Opportunities Fund (Net) vs. the S&P SmallCap 600 Index

As of 3/31/2026	Inception Date	# of 5-Year Periods	Total Return > Index	Total Return >0%	Total Return >10%
Small Cap Fund	3/20/2000	253	56%	91%	63%

Performance data quoted represents past performance, which does not guarantee future results. Investment return and principal value of an investment may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. You should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. Investors may visit our website at www.kineticsfunds.com or call us at 1-800-930-3828 for performance data current to the most recent month-end and for a copy of the most recent Prospectus. You should read the prospectus carefully before you invest.

Performance shown is that of the Kinetics Small Cap Opportunities Fund (No-Load Class). The gross expense ratios listed are as of 12/31/2024 as reported in the 4/30/2025 prospectus. The Fund's adviser voluntarily agreed to waive management fees and reimburse fund expenses so that net annual fund operating expenses do not exceed certain levels, not including acquired fund fees and expenses (AFFE), through April 30, 2026 and may be discontinued at any time by the Fund's adviser after April 30, 2026. The net assets in the Fund as of March 31, 2026 were approximately $565.9 million. The inception date is March 20, 2000. Performance includes the reinvestment of dividends. Performance does not reflect the deduction of a sales load or fee, which, if included, would reduce the performance quoted. You will be charged a redemption fee equal to 2.00% of the net amount of the redemption if you redeem or exchange your shares 30 days or less after you purchase them. Rolling 5-Year Performance and Volatility statistics begin with first complete month of performance. The Growth of $10,000 chart illustrates the performance of a hypothetical $10,000 investment made in No Load Class shares commencement of operations (3/20/00). It assumes reinvestment of capital gains and dividends. This chart is not intended to imply any future performance.

Portfolio Top 10 Holdings

The Small Cap Opportunities Fund – March 31, 2026

HORIZON KINETICS

Name	% of Portfolio	Horizon Kinetics' Perspective
Texas Pacific Land Corporation	56.3	Texas Pacific Land Corp. is a landowner that generates cash flow via easement and oil royalties from owned land in Texas, and its water services business and periodic land sales. As a royalty business, TPL participates in the upside when oil prices rise, without incurring the capital investment requirements of an operator and with lower downside risk.
Hawaiian Electric Industries, Inc.	5.3	HE is an electric utility company that generates, transmits, and distributes electricity across all the Hawaiian Islands. They provide both traditional and renewable energy.
Landbridge Co. LLC	4.8	LandBridge, created in 2021, is a landowner in the Permian Basin with approximately 220,000 surface acres. Its IPO was on June 28, 2024. The company has a diverse set of revenue from resource sales, oil and gas royalties, surface use royalties and easements. At present, oil and gas royalties are less than a quarter of total revenues and will be crowded downward further by the expansion of Resource Sales & Royalties and Surface Sales and Royalties. LandBridge's contiguous surface land has the latent potential to capture developments from the data center itself, related roads, power lines, wind and solar, carbon capture, water cooling – combined has a potential recurring, high-margin revenue stream back to LandBridge.
CACI International, Inc.	4.8	CACI is a defense company focused on data integrity and information, command and control, cyber security, and intelligence. The bulk of its work is done for the United States government; as military spending shifts from emphasizing weaponry to focusing on technology, CACI has the potential to benefit by increasing the number and size of its contracts, while non-military contracts represent another avenue for growth.
WaterBridge Infrastructure LLC	3.5	WBI, which completed its IPO in September 2025, owns and operates integrated water-gathering, disposal, and recycling systems across the Permian Basin. The company's essential infrastructure, long-term fixed-fee contracts, and high barriers to entry create a durable cash-flow profile.
Grayscale Bitcoin Trust ETF	2.8	The Bitcoin Investment Trust invests in bitcoin, a cryptocurrency with the potential to appreciate significantly should it become established as either a store of value or a transactional currency. If bitcoin were to capture even a small share of the electronic payments market, the value of each coin would increase dramatically due to the limited number of coins to be produced. Following the approval ETFs for several providers in early 2024, GBTC uplisted to NYSE Arca as a spot Bitcoin ETF.
Civeo Corp.	2.6	Civeo provides accommodation services for workers on natural resource projects in remote areas. The company is positioned to perform well as demand increases for its services, which is beginning to occur as projects have resumed post pandemic lockdowns and structural commodity shortages are becoming increasingly apparent.
DREAM Unlimited Corp.	1.5	DREAM is a diversified real estate investment and asset management company. As we navigate what we expect to be a period of sustained inflation, hard asset companies such as DREAM are well positioned to benefit.
Carnival Corp.	1.4	Carnival is a cruise line operator. Their business suffered significantly during the COVID-19 pandemic as onerous testing and isolation requirements devastated their business during and after the pandemic. As restrictions have loosened, and the business has shown signs of recovery, the share price has as well.
Associated Capital Group, Inc	1.3	Associated Capital is the alternative assets management business helmed by Mario Gabelli, following its separation from other arms of the business. We believe that in the volatile environment currently facing investors, Associated Capital has the potential to perform well.

***Please refer to slide two for information regarding risks associated with an investment in Bitcoin.**

Holdings information is presented for illustrative purposes only, portfolio holdings are subject to change without notice and it should not be assumed that the holdings were or will prove to be profitable. Holdings are expressed as a percentage of the total net investment and may vary over time. Equity holdings are subject to change, and may not be indicative of actual market position due to the use of call and put options.

Kinetics Small Cap Opportunities Fund

Investment Examples

Texas Pacific Land Corporation (Ticker: TPL)[1]

- TPL was created as a land trust in 1888 as a result of the bankruptcy of the Texas and Pacific Railway Company. In January 2020, it completed a reorganization into a C Corp, which we believe is conducive to greater transparency and improved corporate governance.
- TPL currently owns approximately 880,000 surface acres and 450,000 of non-participating perpetual royalty interests in western Texas, much of which is located in the Delaware and Midland Basins within the Permian Basin.
- TPL's revenue streams are primarily generated through oil and gas royalties, land easements and related revenues, and water services. These cash flows are primarily driven by the activities and capital expenditures of 3rd parties, hence are high profit margin and minimally capital intensive.
- The alternating nature of the land grant, in sections concentrated across the Delaware Basin, virtually requires many well operators, infrastructure providers, and well service providers to utilize the property of TPL, diversifying the revenue streams further.
- Water procurement and disposal is increasingly the largest portion of a well lease operating expense. By virtue of the surface acreage, TPL has a dominant position in acquirer access, water transportation rights, and access to salt water disposal wells. TPL created a dedicated water division, Texas Pacific Water Resources, to monetize this opportunity.
- TPL's portion of the greater Permian Basin has become the focus of multinational oil companies and has become a significant driver of the marginal U.S. (and global) production.
- Despite significant appreciation in recent years, we believe that TPL shares still have substantial return potential in the years to come.

CACI International Inc. (Ticker: CACI)

- CACI is a highly specialized information solutions and services company focused upon national security and related government initiatives. The ambiguous business description is reflective of the clandestine nature of the company's business activities, which include providing secure communication, surveillance, and data monitoring for various branches of the U.S. government.
- CACI's products are crucial to the modern modality of national security and warfare in the form of critical, secure communications and surveillance systems. We believe that cyber security and related services have significant potential for secular growth, as the global governments are in ever greater need or encryption, reconnaissance, and information, and these expenditures seem likely to grow as a share of defense budgets (in lieu of planes, bombs, and boats).
- The company's contracts are typically long-term in nature, and competition is limited due the security clearance requirements and the necessary personnel and technical expertise.

The Fund held these securities as of March 31, 2026. Please see slide 19 for the top holdings of the Fund.
Specific holdings may change at any time without notice.

HORIZON KINETICS

1st Quarter 2026 Commentary

Reading Length: 28 pages/May 2026

This Commentary pauses on the impermanence of that which so many investors over time—at least for awhile— thought to be inherently special or in permanent great demand. Exceedingly few tradeable things within the market (as opposed to the market itself and crowd behavior) are very long-lived. What is a permanent feature of bubble behavior are the collateral effects. There's only so much capital available at any given time: when money moves en masse to a greener pasture, there must be capital outflows from others, eventually creating a deficit. Meaningful valuation opportunities don't exist as a norm; they are inadvertently created episodically by the market itself, or even persistently in some non-indexed sectors or instruments due to investor or institutional constraints. Crowd behavior and market-structure biases likewise create episodic discounts for long-term, income-focused investors, most particularly for those who spend, rather than reinvest, their income. This is when sufficiently great yield premiums or principal accretion possibilities provide a pathway to counteract the serious failing of bonds: unprotected exposure to the purchasing power debasement of inflation. It's no small thing.

Kinetics Mutual Fund 1Q2026 Conference Call Transcript

Peter Doyle, President of Kinetics Mutual Funds, Inc., James Davolos, Senior Portfolio Manager, and Brandon Colavita, Portfolio Manager, hosted a conference call on April 28, 2026.

2026 New Year Letter from Our Founders

Reading Length: 10 pages/January 2026

Some of our clients have remarked upon the private investment funds we've been presenting in recent years—and presenting with some greater frequency. They range from real-asset royalty funds to more than one private securities exchange, and to cryptocurrency mining, and this year both a data-center project and an AI company. It's been asked whether we've wandered from the path of fundamental value investing or become enamored with private funds over individual account management. Rather than "none of the above," the answer is "the opposite." For a deeper explanation, read this year's letter from our founders.

4th Quarter 2025 Commentary

Reading Length: 36 pages/January 2026

Speakers should take a beat once in a while—for breath and for questions. The start of a year is a fine season to take that beat, so this Commentary centers on questions that recently came our way. Many have already answered themselves. And though questions around a favored topic—"Why aren't there data centers yet on TPL land?"—can feel urgent, it's way more important to understand the "why" than the "when." The why, believe it or not, has to do with NVIDIA's new chip and planned obsolescence, advanced hydrogeology, and a host of other fascinating factors. These also happen to be keys to predicting the performance risk in the IT sector and the S&P 500 today. So, it's very much worth understanding, and that's what our latest Commentary aims to help you do.

HORIZON KINETICS

Murray Stahl (1953-2026)

Co-Founder

Murray Stahl (1953-2026) co-founded the Firm in 1994. He served as Chief Executive Officer and Chairman of the Board of Horizon Kinetics Holding Corporation (OTC: HKHC), the parent company of Horizon Kinetics Asset Management LLC, where he was also Chief Investment Officer. His leadership and investment insight were instrumental in shaping the Firm's philosophy and long-term success, and his vision and legacy continue to guide the Firm today. Murray was the Chief Executive Officer of FRMO Corp (OTC: FRMO) and President, Chief Executive Officer, and Co-Portfolio Manager of the RENN Fund, Inc. (NYSE: RCG). He served on the Board of Directors of Texas Pacific Land Corporation (NYSE: TPL) and Miami International Holdings, Inc. (NYSE: MIAX), and was a managing member of MSRH, LLC. Prior to co-founding the Firm, Murray spent 16 years at Bankers Trust Company (1978-1994) as a senior portfolio manager and research analyst, where he was responsible for investing the Utility Mutual Fund, along with three of the bank's Common Trust Funds: The Special Opportunity Fund, The Utility Fund, and The Tangible Assets Fund. He was also a member of the Equity Strategy Group and the Investment Strategy Group, which established asset allocation guidelines for the Private Bank. Murray received a Bachelor of Arts in 1976, a Master of Arts in 1980 from Brooklyn College, and an MBA from Pace University in 1985.

Peter Doyle

Co-Founder, Co-Chief Executive Officer, Co-Chief Investment Officer

Peter is a co-founder, Co-Chief Executive Officer and Co-Chief Investment Officer of Horizon Kinetics. He is a senior member of the Firm's research team, and a member of the Investment Committee and the Board of Directors. Peter is also the President of Kinetics Mutual Funds, Inc., a series of investment companies managed by the Firm. Peter is a Co-Portfolio Manager for several registered investment companies, private funds, and separately managed accounts. Peter currently serves on the Board of Directors of Texas Pacific Land Corp. (NYSE: TPL). Peter is also the Co-Chief Executive Officer of FRMO Corp., an affiliated publicly traded company. Previously, Peter was with Bankers Trust Company (1985-1994) as a Senior Investment Officer, where he also served on the Finance, Utility and REIT Research sub-group teams. Peter received a BS from St. John's University and an MBA from Fordham University.

Steven Bregman

Co-Founder, Co-Chief Executive Officer, Co-Chief Investment Officer

Steven is a co-founder, Co-Chief Executive Officer and Co-Chief Investment Officer of Horizon Kinetics. He is a senior member of the Firm's research team, a member of the Investment Committee and Board of Directors and supervises all research reports produced by the Firm. Steven is a Co-Portfolio Manager for several registered investment companies, private funds, and separately managed accounts. As one of the largest independent research firms, Horizon Kinetics focuses on structurally inefficient market sectors, including domestic spin-offs, global spin-offs (The Spin-Off Report and Global Spin-Off Report), distressed debt (Fixed Income Contrarian) and short sale candidates (Devil's Advocate), among others. Horizon Kinetics has also taken an interest in creating functionally improved indexes, such as the Spin-Off Indexes and the Wealth Indexes (which incorporate the owner-operator return variable). Steven is also the Co-Chief Executive Officer of FRMO Corp., an affiliated publicly traded company and is a member of the Board of Directors of Winland Holdings Inc., a public company. He received a BA from Hunter College, and his CFA® Charter in 1989. Steven has authored a variety of papers, notably "Spin-offs Revisited: A Review of a Structural Pricing Anomaly" (1996) and "Equity Strategies and Inflation" (2012).

Thomas Ewing

Managing Director, Co-Founder

Tom is a Managing Director and co-founder of the Firm. Tom joined the Firm in 1996 and is a member of both the Board and the Investment Committee. Tom oversees Horizon Kinetics' North Carolina office and is instrumental in the creation of new Horizon Kinetics investment strategies. Previously, Tom was a Marketing Director with Smith Barney's Capital Management Division (1989-1991) and then a Financial Consultant at Wheat First Butcher Singer (1991-1996). Tom received a BA from Washington & Lee University.

Definitions

HORIZON KINETICS

Beta: A statistic that measures the volatility of the fund, as compared to that of the overall market. The market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. The Beta has been calculated using data since the fund's inception.

Standard Deviation: A statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. The standard deviation has been calculated since inception.

Up Market Capture Ratio: A statistical measure of an investment manager's overall performance in up-markets. The up-market capture ratio is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen. The up-market capture ratio has been calculated since inception.

Down Market Capture Ratio: A statistical measure of an investment manager's overall performance in down-markets. The down-market capture ratio is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped. The down-market capture ratio has been calculated since inception.

Sharpe Ratio: A statistical measure that uses standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio implies a better historical risk-adjusted performance. The Sharpe ratio has been calculated since inception using the 3-month treasury bill for the risk-free rate of return.

Weighted Avg. Mkt. Cap: The mean market capitalization (value of outstanding shares) of a basket of stocks, taking into account the relative weight of each investment.

Median Market Capitalization: The median market capitalization (value of outstanding shares) of a basket of stocks.

Price to Book Ratio: The harmonic weighted average of the price/book (P/B) ratios of the equity securities referenced. The ratio calculated by dividing the current price of the stock by the company's book value per share (assets minus liabilities).

Price to Earnings Ratio: The harmonic weighted average of the price/earnings (P/E) ratios of the equity securities referenced. The P/E ratio is calculated by dividing the current price of the stock by the trailing one year earnings.

Return on Equity: The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company
generates with the money shareholders have invested.

Turnover Ratio: A measure of how frequently assets within a fund are bought and sold by the managers represented over a one year period.
