## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the 12-month period ended December 31, 2024, the Fund's No-Load class posted 82.86%, significantly outperforming its benchmark S&P 500 Index, which posted 25.02% for the same period.

### WHAT FACTORS INFLUENCED PERFORMANCE

The Fund's performance was driven by strong positive returns in "hard asset" companies, which we believe stand to benefit from rising price levels, particularly in the energy sector. Energy prices were mixed for the year, as strong supply growth negated resilient demand. However, our investments in energy-related royalties and land/infrastructure were less impacted by commodity market fluctuations due to distinct growth drivers. The Fund also benefited from exposure to a niche Industrial supplier to the HVAC/R (heating, ventilation, air conditioning and refrigeration) market. These end markets have sustained secular growth trends which arose during the pandemic recovery.

### POSITIONING

The portfolio remains focused on companies that are actively seeking to maximize shareholder value through spin-offs and subject to restructuring activity. Guided by our long-term value investment philosophy, the Fund may experience periods of outperformance or underperformance relative to the benchmark, but we believe the Fund is well-positioned to generate above-market returns over the long term.

### PERFORMANCE

The Fund's top contributor: Security selection collectively contributed positively to performance particularly within the Energy Sector. Texas Pacific Land Corporation ("TPL") was the largest contributor to returns.

The Fund's top detractor: Bakkt Holdings, Inc ("BKKT") detracted marginally from returns.
