

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund, including the Fund's statement of additional information and shareholder reports, online at <http://kineticsfunds.com/reports.htm>. You can also get this information at no cost by calling (800) 930-3828 or by sending an e-mail request to kineticsfunds@usbank.com, or from your financial intermediary. The Fund's prospectus and statement of additional information, both dated April 30, 2018, are incorporated by reference into this Summary Prospectus.

THE MARKET OPPORTUNITIES FUND

Investment Objective

The investment objective of the Market Opportunities Fund is long-term growth of capital. The Market Cap Opportunities Fund is the sole "feeder fund" to The Market Cap Opportunities Portfolio, a series of Kinetics Portfolios Trust.

Fees and Expenses of the Fund

This table describes the fees and expenses you may pay if you buy and hold shares of the Market Opportunities Fund. You may qualify for sales charge discounts for Advisor Class A shares if you and your family invest, or agree to invest in the future, at least \$50,000 in Advisor Class A shares of the Kinetics Funds. More information about these and other discounts is available from your financial professional and in the sections titled "Description of Advisor Classes" beginning on page 105 of the Fund's prospectus, in Appendix A to this Prospectus - Financial Intermediary Sales Charge Variations, and "Purchasing Shares" beginning on page 58 of the Fund's statement of additional information.

Fee Table⁽¹⁾

Shareholder Fees (fees paid directly from your investment)	Advisor Class A	Advisor Class C
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.75%	None
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption price, whichever is less)	None	1.00%
Redemption Fee (as a percentage of amount redeemed on shares held for 30 days or less, if applicable)	2.00%	2.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Advisor Class A	Advisor Class C
Management Fees ⁽¹⁾	1.25%	1.25%
Distribution and Service (Rule 12b-1) Fees ⁽²⁾	0.50%	1.00%
Other Expenses	0.42%	0.42%
Total Annual Fund Operating Expenses	2.17%	2.67%
Fee Waiver and/or Expense Reimbursements ⁽³⁾	-0.28%	-0.28%
Total Annual Fund Operating Expenses after Fee Waiver and/or Expense Reimbursements	1.89%	2.39%

(1) This table and the example below reflect the aggregate expenses of the Market Opportunities Fund and the Market Opportunities Portfolio. The management fees paid by the Market Opportunities Fund reflect the proportionate share of fees allocated to the Market Opportunities Fund from the Market Opportunities Portfolio.

(2) The Board of Directors (the "Board") of Kinetics Mutual Funds, Inc. has approved a Rule 12b-1 Distribution Plan that allows the Fund to pay up to 0.50% and 0.75% of the average daily net asset value ("NAV") of the Advisor Class A shares and Advisor Class C shares as compensation to the distributor or other qualified recipients, pursuant to the Plan. However, at the present time, the Fund is only assessing 0.25% and 0.75% under the Rule 12b-1 Distribution Plan for Advisor Class A shares and Advisor Class C shares, respectively. In addition, the Board has approved a Shareholder Servicing Plan for Advisor Class A shares and Advisor Class C shares that provides for an annual shareholder servicing fee equal to 0.25% of the average daily net assets attributable to Advisor Class A shares and Advisor Class C shares.

(3) Kinetics Asset Management LLC, the investment adviser to the Market Opportunities Portfolio of the Kinetics Portfolio Trust (the "Investment Adviser"), has agreed to waive management fees and reimburse Fund expenses so that Total Annual Fund Operating Expenses after Fee Waiver and/or Expense Reimbursements do not exceed 1.89% and 2.39%, excluding acquired fund fees and expenses ("AFFE"), for Advisor Class A shares and Advisor Class C shares, respectively. These waivers and reimbursements are in effect until May 1, 2019, and may not be terminated without the approval of the Board.

Example. This Example is intended to help you compare the cost of investing in the Market Opportunities Fund with the cost of investing in other mutual funds. This Example assumes that you invest \$10,000 in the Market Opportunities Fund for the time periods indicated and then redeem all of your shares at the end of these periods. The Example also assumes that your investment has a 5% return each year and that the Market Opportunities Fund's operating expenses remain the same (taking into account the expense limitation only in the first year). Although your actual costs may be higher or lower, based on these assumptions your cost for the Market Opportunities Fund would be:

	1 Year	3 Years	5 Years	10 Years
Advisor Class A (if you redeem your shares at the end of the period)	\$756	\$1,190	\$1,648	\$2,914
Advisor Class C (if you redeem your shares at the end of the period)	\$342	\$803	\$1,390	\$2,982
Advisor Class C (if you do not redeem your shares at the end of the period)	\$242	\$803	\$1,390	\$2,982

Portfolio Turnover. The Market Opportunities Portfolio pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Market Opportunities Portfolio’s, and therefore the Market Opportunities Fund’s, performance. During the most recent fiscal year, the Market Opportunities Portfolio’s portfolio turnover rate was 35% of the average value of its portfolio.

Principal Investment Strategy

The Market Opportunities Fund is a non-diversified fund that invests all of its investable assets in the Market Opportunities Portfolio, a series of Kinetics Portfolios Trust. Under normal circumstances, the Market Opportunities Portfolio invests at least 65% of its net assets in common stocks, convertible securities, warrants and other equity securities having the characteristics of common stocks (such as American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) and International Depositary Receipts (“IDRs”)) of U.S. and foreign companies involved in capital markets or related to capital markets, as well as companies involved in the gaming industry. Capital market companies include companies that are engaged in or derive a substantial portion of their revenue from activities with a publicly traded securities exchange, such as equity exchanges and commodity exchanges, including but not limited to clearing firms and brokerage houses. The Market Opportunities Portfolio may also invest in exchange-traded funds (“ETFs”) and purchase and write options for hedging purposes and/or direct investment.

The Market Opportunities Portfolio may invest up to 20% of its total assets in convertible and non-convertible debt securities rated below investment grade, also known as junk bonds, or unrated securities that the Investment Adviser has determined to be of comparable quality.

The Market Opportunities Portfolio securities will be selected by the Investment Adviser from companies that are engaged in public exchanges, derivative exchanges, and capital markets; companies that experience operational scale from increased volume such as investment banks, credit card processing companies, electronic payment companies and companies in the gaming industry; and from companies that act as facilitators such as publicly traded expressways, airports, roads and railways. Companies that experience operational scale from increased volume are similar to capital markets companies because they have greater fixed costs than variable costs, operating margins that rise once fixed costs are covered, and an ability to generate higher operating margins once fixed costs are covered (referred to as operating leverage). High operating leverage describes a company’s ability to experience rising profit margins as revenues increase. These companies may be large, medium or small in size if, in the Investment Adviser’s opinion, these companies meet the Market Opportunities Portfolio’s investment criteria. The Investment Adviser seeks to invest in companies with high operating leverage that can expand capacity with negligible or limited associated costs. Generally, high returns on equity, long product life cycles, high barriers to entry and certain degrees of financial gearing are necessary for this. Financial gearing occurs with the use of loans and debt in companies where it is necessary to build capacity and infrastructure before operations can begin. Additionally, the Market Opportunities Portfolio may participate in securities lending arrangements up to 33-1/3% of the securities in its portfolio with brokers, dealers, and financial institutions (but not individuals) in order to increase the return on its portfolio.

The Market Opportunities Portfolio may invest indirectly in bitcoins exclusively through a Delaware statutory trust (“Bitcoin Investment Trust”) that offers exposure to bitcoin. Bitcoin Investment Trust offers shares on an ongoing basis through private placements pursuant to the exemption from registration provided by Rule 506(c) under Regulation D of the Securities Act of 1933, as amended. Bitcoins are a digital commodity that is not issued by a government, bank or central organization. Bitcoins exist on an online, peer-to-peer computer network (the “Bitcoin Network”) that hosts a public transaction ledger where bitcoin transfers are recorded (the “Blockchain”). Bitcoins have no physical existence beyond the record of transactions on the Blockchain. The Bitcoin Investment Trust invests principally in bitcoins.

The Market Opportunities Portfolio recently contributed a portion of its holdings in the Bitcoin Investment Trust to a wholly-owned and controlled subsidiary organized under the laws of the Cayman Islands (the “Cayman Subsidiary”). The Market Opportunities Portfolio will realize capital gain on the transfer to the extent the value of the transferred Bitcoin Investment Trust interest at the time of transfer exceeds its tax basis in the hands of the Market Opportunities Portfolio.

The Market Opportunities Portfolio is also the sole shareholder of a wholly owned subsidiary organized under Delaware law (the “Delaware Subsidiary”). The Market Opportunities Portfolio may in the future contribute a portion of its holdings in the Bitcoin Investment Trust to the Delaware Subsidiary. Any net gains that the Delaware Subsidiary recognizes on future sales of the contributed Bitcoin Investment Trust shares will be subject to federal and state corporate income tax, but the dividends that the Delaware Subsidiary pays to the Market Opportunities Portfolio (*i.e.*, those gains, net of the tax paid and any other expenses of the Delaware Subsidiary, such as its management and advisory fees) will be eligible to be treated as “qualified dividend income” under the Internal Revenue Code. The Delaware Subsidiary and the Cayman Subsidiary are each referred to herein as a “Subsidiary” and collectively as “Subsidiaries.” Additional information regarding the tax treatment of the Fund is provided in the “Taxes” section of the SAI.

In the future, the Market Opportunities Portfolio may seek to gain additional exposure to the Bitcoin Investment Trust that may not produce qualifying income for the Market Opportunities Fund under the Internal Revenue Code, if held directly. The Market Opportunities Portfolio will not make any additional investments in the Bitcoin Investment Trust if as a result of such investment, its aggregate investment in the Bitcoin Investment Trust, either directly or through a Subsidiary would be more than 15% of its assets at the time of the investment.

Each Subsidiary invests primarily in the Bitcoin Investment Trust. The Market Opportunities Portfolio will invest in its Subsidiaries within the limitations of the federal tax laws, rules and regulations that apply to “regulated investment companies” (“RICs”) under Subchapter M of Subtitle A, Chapter 1, of the Internal Revenue Code (“Subchapter M”). However, the Market Opportunities Portfolio and each Subsidiary comply with the same fundamental investment restrictions on an aggregate basis, to the extent those restrictions are applicable to the investment activities of each Subsidiary. Each Subsidiary also complies with Section 17 of the Investment Company Act of 1940 (the “1940 Act”) relating to affiliated transactions and custody. Unlike the Market Opportunities Fund, each Subsidiary does not, and will not, seek to qualify as a RIC. The Market Opportunities Portfolio is the sole shareholder of each Subsidiary and does not expect shares of the Subsidiaries to be offered or sold to other investors.

Sell decisions are generally triggered by either adequate value being achieved, as determined by the Investment Adviser, or by an adverse change in a company’s operating performance or a deterioration of the company’s business model. A sell trigger may also occur if the Investment Adviser

discovers a new investment opportunity that it believes is more compelling and represents a greater risk reward profile than other investment(s) held by the Market Opportunities Portfolio.

Principal Investment Risks

Investing in common stocks has inherent risks that could cause you to lose money. The principal risks of investing in the Market Opportunities Fund, and indirectly the Market Opportunities Portfolio, are listed below and could adversely affect the NAV, total return and the value of the Market Opportunities Fund, Market Opportunities Portfolio and your investment.

- **Stock Market Risks:** Stock mutual funds are subject to stock market risks and significant fluctuations in value. If the stock market declines in value, the Market Opportunities Portfolio, and therefore the Market Opportunities Fund, is likely to decline in value and you could lose money on your investment.
- **Stock Selection Risks:** The portfolio securities selected by the Investment Adviser may decline in value or not increase in value when the stock market in general is rising and may fail to meet the Market Opportunities Portfolio's, and therefore the Market Opportunities Fund's, investment objective.
- **Liquidity Risks:** The Investment Adviser may not be able to sell portfolio securities at an optimal time or price.
- **Sector Emphasis Risks:** The Market Opportunities Portfolio's investments in the capital markets sector subjects it to the risks affecting that sector more than would a fund that invests in a wide variety of market sectors. For instance, companies in the capital markets sector may be adversely affected by changes in economic conditions as well as legislative initiatives, all of which may impact the profitability of companies in this sector. The Market Opportunities Portfolio's investments in the gaming sector may be adversely affected by changes in economic conditions. The casino industry is particularly susceptible to economic conditions that negatively affect tourism. Casino and gaming companies are highly competitive, and new products, casino concepts and venues are competitive challenges to existing companies. In addition, gaming and related companies are highly regulated, and state and federal legislative changes can significantly impact profitability in those sectors.
- **Small and Medium-Size Company Risks:** The Market Opportunities Portfolio may invest in the equity securities of small and medium-size companies. Small and medium-size companies often have narrower markets and more limited managerial and financial resources than do larger, more established companies. As a result, their performance can be more volatile and they face a greater risk of business failure, which could increase the volatility of the Market Opportunities Portfolio's assets.
- **Exchange-Traded Funds (ETFs) Risks:** ETFs are registered investment companies whose shares are listed and traded on U.S. stock exchanges or otherwise traded in the over-the-counter market. In general, passively-managed ETFs seek to track a specified securities index or a basket of securities that an "index provider," such as Standard & Poor's, selects as representative of a market, market segment or industry sector. A passively-managed ETF is designed so that its performance will correspond closely with that of the index it tracks. A leveraged ETF will engage in transactions and purchase instruments that give rise to forms of leverage, including, among others, the use of reverse repurchase agreements and other borrowings, the investment of collateral from loans of portfolio securities, the use of when issued, delayed-delivery or forward commitment transactions or short sales. To the extent a fund invests in ETFs that achieve leveraged exposure to their underlying indexes through the use of derivative instruments, the fund will indirectly be subject to leveraging risk. As a shareholder in an ETF, the Market Opportunities Portfolio will bear its pro rata portion of an ETF's expenses, including advisory fees, in addition to its own expenses.
- **Foreign Securities Risks:** The Market Opportunities Portfolio may invest in foreign securities directly or through ADRs, GDRs and IDRs. Foreign securities can carry higher returns but involve more risks than those associated with U.S. investments. Additional risks associated with investment in foreign securities include currency fluctuations, political and economic instability, differences in financial reporting standards and less stringent regulation of securities markets.
- **Non-Diversification Risks:** As a non-diversified investment company, the Market Opportunities Portfolio can invest a large percentage of its assets in a small number of issuers. As a result, a change in the value of any one investment may affect the overall value of the Market Opportunities Portfolio's shares, and therefore the Market Opportunities Fund's shares, more than shares of a diversified mutual fund that holds more investments.
- **Interest Rate Risk:** The risk that when interest rates increase, fixed-income securities held by the Market Opportunities Portfolio will decline in value. Long-term fixed-income securities will normally have more price volatility because of this risk than short-term fixed-income securities. It is likely there will be less governmental action in the near future to maintain low interest rates. The negative impact on fixed income securities from the resulting rate increases for that and other reasons could be swift and significant.
- **Leveraging Risks:** Investments in derivative instruments may give rise to a form of leverage. The Investment Adviser may engage in speculative transactions, which involve substantial risk and leverage. The use of leverage by the Investment Adviser may increase the volatility of the Market Opportunities Portfolio. These leveraged instruments may result in losses to the Market Opportunities Portfolio or may adversely affect the Market Opportunities Portfolio's NAV or total return, because instruments that contain leverage are more sensitive to changes in interest rates. The Market Opportunities Portfolio may also have to sell assets at inopportune times to satisfy its obligations in connection with such transactions.
- **Option Transaction Risks:** Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. The successful use of options depends in part on the ability of the Investment Adviser to manage future price fluctuations and the degree of correlation between the options and securities markets. By writing put options on equity securities, the Market Opportunities Portfolio gives up the opportunity to benefit from potential increases in the value of the common stocks above the strike prices of the written put options, but continues to bear the risk of declines in the value of its common stock portfolio. The Market Opportunities Portfolio will receive a premium from writing a covered call option that it retains whether or not the option is exercised. The premium received from the written options may not be sufficient to offset any losses sustained from the volatility of the underlying equity securities over time.
- **Below Investment Grade Debt Securities Risks:** Generally, below investment grade debt securities, *i.e.*, junk bonds, are subject to greater credit risk, price volatility and risk of loss than investment grade securities. Junk bonds are considered to be speculative in nature.
- **Convertible Securities Risks:** Convertible securities are subject to the risks affecting both equity and fixed income securities, including market, credit, liquidity and interest rate risk.
- **Management Risks:** There is no guarantee that the Market Opportunities Fund will meet its investment objective. The Investment Adviser does not guarantee the performance of the Market Opportunities Fund, nor can it assure you that the market value of your investment will not decline.
- **Bitcoin Risks:** The value of the Market Opportunities Portfolio's investment in the Bitcoin Investment Trust directly and indirectly through its Subsidiaries is subject to fluctuations in the value of bitcoins. The value of bitcoins is determined by the supply of and demand for bitcoins in the global market for the trading of bitcoins, which consists of transactions on electronic bitcoin exchanges ("Bitcoin Exchanges"). Pricing on

Bitcoin Exchanges and other venues can be volatile and can adversely affect the value of the Bitcoin Investment Trust. Currently, there is relatively small use of bitcoins in the retail and commercial marketplace in comparison to the relatively large use of bitcoins by speculators, thus contributing to price volatility that could adversely affect the Market Opportunities Portfolio's investment in the Bitcoin Investment Trust. Bitcoin transactions are irrevocable, and stolen or incorrectly transferred bitcoins may be irretrievable. As a result, any incorrectly executed bitcoin transactions could adversely affect the value of the Market Opportunities Portfolio's investment in the Bitcoin Investment Trust. Shares of the Bitcoin Investment Trust may trade at a premium or discount to the net asset value of the Bitcoin Investment Trust.

- **Regulatory Risk:** Bitcoin is generally not subject to the same degree of regulation as are registered U.S. securities. The reporting, accounting and auditing standards for Bitcoin may differ from the standards for registered U.S. securities. Furthermore, countries, including the U.S., may in the future curtail or outlaw the acquisition, use or redemption of bitcoins.
- **Volatility Risk:** The Portfolio may have investments, including but not limited to Bitcoin, that appreciate or depreciate significantly in value over short periods of time. This may cause the Portfolio's net asset value per share to experience significant increases or declines in value over short periods of time.
- **Valuation Risk:** The sales price the Portfolio could receive for any particular portfolio investment may differ from the Portfolio's valuation of the investment, particularly for securities or other investments, such as Bitcoin, that trade in thin or volatile markets or that are valued using a fair value methodology. Valuation may be more difficult in times of market turmoil since many investors and market makers may be reluctant to purchase complex instruments or quote prices for them. The Portfolio's ability to value its investments may be impacted by technological issues and/or errors by pricing services or other third party service providers. Shares of Bitcoin Investment Trust are intended to reflect the price of bitcoin assets, less fees and expenses, and the shares currently trade at a substantial premium to the net asset value of such assets. As such, the price of Bitcoin Investment Trust may go down even if the price of the underlying asset, bitcoin, remains unchanged. Additionally, shares that trade at a premium mean that an investor who purchases \$1 of a portfolio will actually own less than \$1 in assets.
- **Subsidiary Risks:** By investing in its Subsidiaries, the Market Opportunities Portfolio is indirectly exposed to the risks associated with each Subsidiary's investments. Those investments held by the Subsidiaries are generally similar to the investments that are permitted to be held by the Market Opportunities Portfolio and are subject to the same risks that would apply to similar investments if held directly by the Market Opportunities Portfolio. Each Subsidiary is not registered under the 1940 Act and, unless otherwise noted in this Prospectus, is not subject to all the investor protections of the 1940 Act. In addition, changes in the laws of the United States, Delaware and/or the Cayman Islands could result in the inability of the Market Opportunities Portfolio and/or its Subsidiaries to continue to operate and could adversely affect the Market Opportunities Fund's performance.
- **Tax Risks:** In order to qualify as a RIC, the Market Opportunities Fund must meet certain requirements regarding the source of its income, the diversification of its assets and the distribution of its income. Under the test regarding the source of a RIC's income, at least 90% of the gross income of the RIC each year must be qualifying income, which consists of dividends, interest, gains on investments in securities and certain other categories of investment income. It appears to be the position of the Internal Revenue Service ("IRS") that gain realized on bitcoin investments such as investments in the Bitcoin Investment Trust will not be qualifying income. The Market Opportunities Portfolio's investment in each Subsidiary is expected to provide the Market Opportunities Fund with exposure to such bitcoin investments within the limitations of the Internal Revenue Code for qualification as a RIC because, under applicable tax rules, the income earned by each Subsidiary will flow out as qualifying income for the RIC even though the income would not be qualifying income if earned directly by the RIC. There is a risk, however, that the IRS might assert that the income derived from the Market Opportunities Portfolio's investment in a Subsidiary will not be considered qualifying income. If the Market Opportunities Fund were to fail to qualify as a RIC and became subject to federal income tax, shareholders of that Market Opportunities Fund would be subject to diminished returns. Changes in the laws of the United States, Delaware and/or the Cayman Islands could result in the inability of the Market Opportunities Portfolio and/or its Subsidiaries to operate as described in this Prospectus and could adversely affect the Market Opportunities Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Cayman Subsidiary. If Cayman Islands law changes such that the Cayman Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

Who may want to invest?

The Market Opportunities Fund may be appropriate for investors who:

- wish to invest for the long-term;
- want to diversify their portfolios;
- want to allocate some portion of their long-term investments to value equity investing;
- are willing to accept the volatility associated with equity and Bitcoin investing; and
- are comfortable with the risks described herein.

Performance

The bar chart and table shown below illustrate the variability of the Market Opportunities Fund's returns. The bar chart indicates the risks of investing in the Market Opportunities Fund by showing the changes in the Market Opportunities Fund's performance from year to year (on a calendar year basis). The table shows how the Market Opportunities Fund's average annual returns, before and after taxes (after taking into account any sales charges) compare with those of the S&P 500® Index and the MSCI EAFE Index, which represent broad measures of market performance. The past performance of the Market Opportunities Fund, before and after taxes, is not necessarily an indication of how the Market Opportunities Fund or the Market Opportunities Portfolio will perform in the future. The bar chart shows how the performance of Advisor Class A shares (the Class with the longest period of annual returns) has varied from year to year. The returns for Advisor Class C shares were different than the returns shown below because each Class of shares has different expenses. Updated performance information is available on the Fund's website at <http://www.kineticsfunds.com/> or by calling the Fund toll-free at (800) 930-3828.

**The Market Opportunities Fund – Advisor Class A
Calendar Year Returns as of 12/31**

Sales charges are not reflected in the bar chart. If these amounts were reflected, returns would be less than those shown.

Best Quarter:	2009	Q2	30.36%
Worst Quarter:	2008	Q4	-27.26%

The after-tax returns for the Market Opportunities Fund's Advisor Class A shares as shown in the following table are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns depend on your tax situation and may differ from those shown. If you own Fund shares in a tax-deferred account, such as a 401(k) plan or an individual retirement account ("IRA"), the information on after-tax returns is not relevant to your investment. After-tax returns are shown for Advisor Class A shares only. After-tax returns for Advisor Class C shares will differ. The Return After Taxes on Distributions and Sale of Fund Shares is higher than other return figures when a capital loss occurs upon the redemption of Fund shares.

Average Annual Total Returns as of 12/31/2017

	1 Year	5 Years	10 Years	Since Inception ⁽¹⁾
The Market Opportunities Fund (KMKAX) Advisor Class A				
Return Before Taxes	38.48%	15.77%	5.33%	8.72%
Return After Taxes on Distributions	38.23%	15.71%	5.19%	8.60%
Return After Taxes on Distributions and Sale of Fund Shares	21.84%	12.74%	4.23%	7.22%
S&P 500® Index (reflects no deductions for fees, expenses or taxes)	21.83%	15.79%	8.50%	8.66%
MSCI EAFE Index (reflects no deductions for fees, expenses or taxes)	25.03%	7.90%	1.94%	4.04%
The Market Opportunities Fund (KMKCX) Advisor Class C				
Return Before Taxes	45.12%	16.55%	5.44%	7.03%
S&P 500® Index (reflects no deductions for fees, expenses, or taxes)	21.83%	15.79%	8.50%	8.04%
MSCI EAFE Index (reflects no deductions for fees, expenses or taxes)	25.03%	7.90%	1.94%	2.38%

(1) The Market Opportunities Fund's Advisor Class A shares commenced operations on January 31, 2006 and Advisor Class C share commenced operations on February 16, 2007. The returns for the two indices in this column have been calculated since the inception date of Advisor Class A shares and Advisor Class C shares, as applicable.

Management

Investment Adviser. Kinetics Asset Management LLC is the Market Opportunities Portfolio's investment adviser.

Portfolio Managers. The Market Opportunities Portfolio is managed by an investment team with Mr. Doyle and Mr. Stahl as the Co-Portfolio Managers. Each investment team member serves as a research analyst.

<i>Investment team member</i>	<i>Primary Title</i>	<i>Years of Service with the Fund</i>
Peter B. Doyle	Co-Portfolio Manager	12
Murray Stahl	Co-Portfolio Manager	12
Eric Sites	Investment Team Member	7
James Davolos	Investment Team Member	12
Steven Bregman	Investment Team Member	2

Purchase and Sale of Fund Shares

You may purchase, exchange or redeem Fund shares on any business day by written request via mail (Kinetics Mutual Funds – The Market Opportunities Fund, c/o U.S. Bancorp Fund Services, LLC, P.O. Box 701, Milwaukee, Wisconsin 53201-0701), by telephone at 1-800-930-3828, or through a financial intermediary. You may also purchase or redeem Fund shares by wire transfer. The minimum initial investment for both regular accounts and IRAs is \$2,500 (\$2,000 for Coverdell Education Savings Accounts). There is no minimum on subsequent investments for all account types.

Tax Information

Unless you are investing through a tax-deferred arrangement, such as a 401(k) or an IRA, the Fund's distributions will generally be taxable to you as ordinary income or capital gains, and you will generally recognize gain or loss when you redeem shares.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary, the Fund and/or its Investment Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
